

Adding Fractions - Like and Unlike Denominators

Calculate the value of each addition question in lowest terms

$$\frac{5}{7} + \frac{1}{3} = \frac{\square}{\square}$$

$$\frac{4}{5} + \frac{5}{7} = \frac{\square}{\square}$$

$$\frac{3}{6} + \frac{5}{6} = \frac{\square}{\square}$$

$$\frac{1}{4} + \frac{4}{5} = \frac{\square}{\square}$$

$$\frac{1}{2} + \frac{3}{5} = \frac{\square}{\square}$$

$$\frac{6}{7} + \frac{1}{5} = \frac{\square}{\square}$$

$$\frac{2}{7} + \frac{6}{7} = \frac{\square}{\square}$$

$$\frac{1}{2} + \frac{2}{3} = \frac{\square}{\square}$$

$$\frac{5}{6} + \frac{1}{2} = \frac{\square}{\square}$$

$$\frac{4}{5} + \frac{3}{7} = \frac{\square}{\square}$$

$$\frac{5}{7} + \frac{5}{7} = \frac{\square}{\square}$$

$$\frac{3}{4} + \frac{5}{6} = \frac{\square}{\square}$$

$$\frac{4}{5} + \frac{3}{4} = \frac{\square}{\square}$$

$$\frac{2}{7} + \frac{7}{8} = \frac{\square}{\square}$$

$$\frac{5}{8} + \frac{3}{5} = \frac{\square}{\square}$$

$$\frac{4}{8} + \frac{2}{3} = \frac{\square}{\square}$$

$$\frac{4}{7} + \frac{4}{6} = \frac{\square}{\square}$$

$$\frac{3}{5} + \frac{2}{3} = \frac{\square}{\square}$$

$$\frac{5}{7} + \frac{1}{3} = \frac{22}{21}$$

$$\frac{4}{5} + \frac{5}{7} = \frac{53}{35}$$

$$\frac{3}{6} + \frac{5}{6} = \frac{4}{3}$$

$$\frac{1}{4} + \frac{4}{5} = \frac{21}{20}$$

$$\frac{1}{2} + \frac{3}{5} = \frac{11}{10}$$

$$\frac{6}{7} + \frac{1}{5} = \frac{37}{35}$$

$$\frac{2}{7} + \frac{6}{7} = \frac{8}{7}$$

$$\frac{1}{2} + \frac{2}{3} = \frac{7}{6}$$

$$\frac{5}{6} + \frac{1}{2} = \frac{4}{3}$$

$$\frac{4}{5} + \frac{3}{7} = \frac{43}{35}$$

$$\frac{5}{7} + \frac{5}{7} = \frac{10}{7}$$

$$\frac{3}{4} + \frac{5}{6} = \frac{19}{12}$$

$$\frac{4}{5} + \frac{3}{4} = \frac{31}{20}$$

$$\frac{2}{7} + \frac{7}{8} = \frac{65}{56}$$

$$\frac{5}{8} + \frac{3}{5} = \frac{49}{40}$$

$$\frac{4}{8} + \frac{2}{3} = \frac{7}{6}$$

$$\frac{4}{7} + \frac{4}{6} = \frac{26}{21}$$

$$\frac{3}{5} + \frac{2}{3} = \frac{19}{15}$$
