

Adding Fractions - Like and Unlike Denominators

Calculate the value of each addition question in lowest terms

$$\frac{2}{3} + \frac{2}{5} = \frac{\square}{\square}$$

$$\frac{3}{7} + \frac{2}{3} = \frac{\square}{\square}$$

$$\frac{1}{3} + \frac{6}{7} = \frac{\square}{\square}$$

$$\frac{1}{2} + \frac{6}{7} = \frac{\square}{\square}$$

$$\frac{3}{4} + \frac{5}{7} = \frac{\square}{\square}$$

$$\frac{5}{8} + \frac{3}{7} = \frac{\square}{\square}$$

$$\frac{5}{7} + \frac{1}{3} = \frac{\square}{\square}$$

$$\frac{1}{2} + \frac{3}{5} = \frac{\square}{\square}$$

$$\frac{2}{3} + \frac{6}{7} = \frac{\square}{\square}$$

$$\frac{7}{8} + \frac{1}{7} = \frac{\square}{\square}$$

$$\frac{6}{7} + \frac{1}{6} = \frac{\square}{\square}$$

$$\frac{1}{4} + \frac{6}{7} = \frac{\square}{\square}$$

$$\frac{2}{4} + \frac{3}{5} = \frac{\square}{\square}$$

$$\frac{2}{3} + \frac{1}{2} = \frac{\square}{\square}$$

$$\frac{6}{7} + \frac{3}{5} = \frac{\square}{\square}$$

$$\frac{2}{3} + \frac{5}{7} = \frac{\square}{\square}$$

$$\frac{2}{7} + \frac{4}{5} = \frac{\square}{\square}$$

$$\frac{5}{7} + \frac{2}{4} = \frac{\square}{\square}$$

$$\frac{2}{3} + \frac{2}{5} = \frac{16}{15}$$

$$\frac{3}{7} + \frac{2}{3} = \frac{23}{21}$$

$$\frac{1}{3} + \frac{6}{7} = \frac{25}{21}$$

$$\frac{1}{2} + \frac{6}{7} = \frac{19}{14}$$

$$\frac{3}{4} + \frac{5}{7} = \frac{41}{28}$$

$$\frac{5}{8} + \frac{3}{7} = \frac{59}{56}$$

$$\frac{5}{7} + \frac{1}{3} = \frac{22}{21}$$

$$\frac{1}{2} + \frac{3}{5} = \frac{11}{10}$$

$$\frac{2}{3} + \frac{6}{7} = \frac{32}{21}$$

$$\frac{7}{8} + \frac{1}{7} = \frac{57}{56}$$

$$\frac{6}{7} + \frac{1}{6} = \frac{43}{42}$$

$$\frac{1}{4} + \frac{6}{7} = \frac{31}{28}$$

$$\frac{2}{4} + \frac{3}{5} = \frac{11}{10}$$

$$\frac{2}{3} + \frac{1}{2} = \frac{7}{6}$$

$$\frac{6}{7} + \frac{3}{5} = \frac{51}{35}$$

$$\frac{2}{3} + \frac{5}{7} = \frac{29}{21}$$

$$\frac{2}{7} + \frac{4}{5} = \frac{38}{35}$$

$$\frac{5}{7} + \frac{2}{4} = \frac{17}{14}$$
