

Adding Fractions - Like and Unlike Denominators

Calculate the value of each addition question in lowest terms

$$\frac{4}{6} + \frac{1}{4} = \frac{\square}{\square}$$

$$\frac{2}{7} + \frac{1}{4} = \frac{\square}{\square}$$

$$\frac{2}{3} + \frac{1}{8} = \frac{\square}{\square}$$

$$\frac{1}{5} + \frac{1}{5} = \frac{\square}{\square}$$

$$\frac{1}{5} + \frac{4}{6} = \frac{\square}{\square}$$

$$\frac{3}{5} + \frac{1}{5} = \frac{\square}{\square}$$

$$\frac{1}{6} + \frac{1}{2} = \frac{\square}{\square}$$

$$\frac{1}{6} + \frac{1}{7} = \frac{\square}{\square}$$

$$\frac{1}{5} + \frac{1}{4} = \frac{\square}{\square}$$

$$\frac{1}{3} + \frac{1}{3} = \frac{\square}{\square}$$

$$\frac{2}{3} + \frac{1}{4} = \frac{\square}{\square}$$

$$\frac{1}{4} + \frac{2}{5} = \frac{\square}{\square}$$

$$\frac{1}{5} + \frac{1}{2} = \frac{\square}{\square}$$

$$\frac{1}{3} + \frac{1}{6} = \frac{\square}{\square}$$

$$\frac{1}{3} + \frac{3}{5} = \frac{\square}{\square}$$

$$\frac{2}{5} + \frac{3}{7} = \frac{\square}{\square}$$

$$\frac{4}{6} + \frac{1}{3} = \frac{\square}{\square}$$

$$\frac{3}{6} + \frac{1}{2} = \frac{\square}{\square}$$

$$\frac{4}{6} + \frac{1}{4} = \frac{11}{12}$$

$$\frac{2}{7} + \frac{1}{4} = \frac{15}{28}$$

$$\frac{2}{3} + \frac{1}{8} = \frac{19}{24}$$

$$\frac{1}{5} + \frac{1}{5} = \frac{2}{5}$$

$$\frac{1}{5} + \frac{4}{6} = \frac{13}{15}$$

$$\frac{3}{5} + \frac{1}{5} = \frac{4}{5}$$

$$\frac{1}{6} + \frac{1}{2} = \frac{2}{3}$$

$$\frac{1}{6} + \frac{1}{7} = \frac{13}{42}$$

$$\frac{1}{5} + \frac{1}{4} = \frac{9}{20}$$

$$\frac{1}{3} + \frac{1}{3} = \frac{2}{3}$$

$$\frac{2}{3} + \frac{1}{4} = \frac{11}{12}$$

$$\frac{1}{4} + \frac{2}{5} = \frac{13}{20}$$

$$\frac{1}{5} + \frac{1}{2} = \frac{7}{10}$$

$$\frac{1}{3} + \frac{1}{6} = \frac{1}{2}$$

$$\frac{1}{3} + \frac{3}{5} = \frac{14}{15}$$

$$\frac{2}{5} + \frac{3}{7} = \frac{29}{35}$$

$$\frac{4}{6} + \frac{1}{3} = \frac{1}{1}$$

$$\frac{3}{6} + \frac{1}{2} = \frac{1}{1}$$
