

Addition Fractions - Like Denominators

Calculate the value of each addition question in lowest terms

$$\frac{3}{5} + \frac{3}{5} = \frac{\quad}{\quad}$$

$$\frac{3}{5} + \frac{4}{5} = \frac{\quad}{\quad}$$

$$\frac{3}{4} + \frac{3}{4} = \frac{\quad}{\quad}$$

$$\frac{6}{8} + \frac{7}{8} = \frac{\quad}{\quad}$$

$$\frac{3}{5} + \frac{3}{5} = \frac{\quad}{\quad}$$

$$\frac{3}{6} + \frac{5}{6} = \frac{\quad}{\quad}$$

$$\frac{2}{3} + \frac{2}{3} = \frac{\quad}{\quad}$$

$$\frac{3}{8} + \frac{6}{8} = \frac{\quad}{\quad}$$

$$\frac{3}{6} + \frac{4}{6} = \frac{\quad}{\quad}$$

$$\frac{4}{8} + \frac{7}{8} = \frac{\quad}{\quad}$$

$$\frac{4}{8} + \frac{6}{8} = \frac{\quad}{\quad}$$

$$\frac{6}{8} + \frac{7}{8} = \frac{\quad}{\quad}$$

$$\frac{6}{8} + \frac{4}{8} = \frac{\quad}{\quad}$$

$$\frac{3}{6} + \frac{4}{6} = \frac{\quad}{\quad}$$

$$\frac{3}{5} + \frac{3}{5} = \frac{\quad}{\quad}$$

$$\frac{2}{5} + \frac{4}{5} = \frac{\quad}{\quad}$$

$$\frac{4}{6} + \frac{5}{6} = \frac{\quad}{\quad}$$

$$\frac{7}{8} + \frac{7}{8} = \frac{\quad}{\quad}$$

$$\frac{3}{5} + \frac{3}{5} = \frac{6}{5}$$

$$\frac{3}{5} + \frac{4}{5} = \frac{7}{5}$$

$$\frac{3}{4} + \frac{3}{4} = \frac{3}{2}$$

$$\frac{6}{8} + \frac{7}{8} = \frac{13}{8}$$

$$\frac{3}{5} + \frac{3}{5} = \frac{6}{5}$$

$$\frac{3}{6} + \frac{5}{6} = \frac{4}{3}$$

$$\frac{2}{3} + \frac{2}{3} = \frac{4}{3}$$

$$\frac{3}{8} + \frac{6}{8} = \frac{9}{8}$$

$$\frac{3}{6} + \frac{4}{6} = \frac{7}{6}$$

$$\frac{4}{8} + \frac{7}{8} = \frac{11}{8}$$

$$\frac{4}{8} + \frac{6}{8} = \frac{5}{4}$$

$$\frac{6}{8} + \frac{7}{8} = \frac{13}{8}$$

$$\frac{6}{8} + \frac{4}{8} = \frac{5}{4}$$

$$\frac{3}{6} + \frac{4}{6} = \frac{7}{6}$$

$$\frac{3}{5} + \frac{3}{5} = \frac{6}{5}$$

$$\frac{2}{5} + \frac{4}{5} = \frac{6}{5}$$

$$\frac{4}{6} + \frac{5}{6} = \frac{3}{2}$$

$$\frac{7}{8} + \frac{7}{8} = \frac{7}{4}$$
