

Adding Fractions - Unlike Denominators

Calculate the value of each addition question in lowest terms

$$\frac{1}{4} + \frac{1}{5} = \frac{\quad}{\quad}$$

$$\frac{1}{2} + \frac{5}{6} = \frac{\quad}{\quad}$$

$$\frac{2}{6} + \frac{4}{7} = \frac{\quad}{\quad}$$

$$\frac{5}{8} + \frac{1}{2} = \frac{\quad}{\quad}$$

$$\frac{2}{6} + \frac{2}{7} = \frac{\quad}{\quad}$$

$$\frac{6}{7} + \frac{1}{5} = \frac{\quad}{\quad}$$

$$\frac{3}{4} + \frac{5}{8} = \frac{\quad}{\quad}$$

$$\frac{5}{6} + \frac{1}{3} = \frac{\quad}{\quad}$$

$$\frac{5}{6} + \frac{1}{3} = \frac{\quad}{\quad}$$

$$\frac{3}{7} + \frac{4}{5} = \frac{\quad}{\quad}$$

$$\frac{3}{4} + \frac{1}{6} = \frac{\quad}{\quad}$$

$$\frac{2}{4} + \frac{5}{7} = \frac{\quad}{\quad}$$

$$\frac{4}{8} + \frac{3}{7} = \frac{\quad}{\quad}$$

$$\frac{4}{8} + \frac{1}{2} = \frac{\quad}{\quad}$$

$$\frac{2}{4} + \frac{1}{2} = \frac{\quad}{\quad}$$

$$\frac{6}{8} + \frac{1}{3} = \frac{\quad}{\quad}$$

$$\frac{1}{5} + \frac{2}{3} = \frac{\quad}{\quad}$$

$$\frac{1}{2} + \frac{1}{7} = \frac{\quad}{\quad}$$

$$\frac{1}{4} + \frac{1}{5} = \frac{9}{20}$$

$$\frac{1}{2} + \frac{5}{6} = \frac{4}{3}$$

$$\frac{2}{6} + \frac{4}{7} = \frac{19}{21}$$

$$\frac{5}{8} + \frac{1}{2} = \frac{9}{8}$$

$$\frac{2}{6} + \frac{2}{7} = \frac{13}{21}$$

$$\frac{6}{7} + \frac{1}{5} = \frac{37}{35}$$

$$\frac{3}{4} + \frac{5}{8} = \frac{11}{8}$$

$$\frac{5}{6} + \frac{1}{3} = \frac{7}{6}$$

$$\frac{5}{6} + \frac{1}{3} = \frac{7}{6}$$

$$\frac{3}{7} + \frac{4}{5} = \frac{43}{35}$$

$$\frac{3}{4} + \frac{1}{6} = \frac{11}{12}$$

$$\frac{2}{4} + \frac{5}{7} = \frac{17}{14}$$

$$\frac{4}{8} + \frac{3}{7} = \frac{13}{14}$$

$$\frac{4}{8} + \frac{1}{2} = \frac{1}{1}$$

$$\frac{2}{4} + \frac{1}{2} = \frac{1}{1}$$

$$\frac{6}{8} + \frac{1}{3} = \frac{13}{12}$$

$$\frac{1}{5} + \frac{2}{3} = \frac{13}{15}$$

$$\frac{1}{2} + \frac{1}{7} = \frac{9}{14}$$
