

Adding Fractions - Unlike Denominators

Calculate the value of each addition question in lowest terms

$$\frac{1}{7} + \frac{2}{4} = \frac{\square}{\square}$$

$$\frac{1}{3} + \frac{1}{4} = \frac{\square}{\square}$$

$$\frac{1}{8} + \frac{2}{6} = \frac{\square}{\square}$$

$$\frac{2}{7} + \frac{1}{6} = \frac{\square}{\square}$$

$$\frac{1}{3} + \frac{1}{4} = \frac{\square}{\square}$$

$$\frac{4}{7} + \frac{2}{6} = \frac{\square}{\square}$$

$$\frac{1}{5} + \frac{1}{3} = \frac{\square}{\square}$$

$$\frac{1}{2} + \frac{3}{6} = \frac{\square}{\square}$$

$$\frac{1}{6} + \frac{1}{3} = \frac{\square}{\square}$$

$$\frac{1}{2} + \frac{1}{3} = \frac{\square}{\square}$$

$$\frac{1}{2} + \frac{2}{5} = \frac{\square}{\square}$$

$$\frac{2}{8} + \frac{3}{7} = \frac{\square}{\square}$$

$$\frac{5}{8} + \frac{1}{4} = \frac{\square}{\square}$$

$$\frac{1}{3} + \frac{1}{6} = \frac{\square}{\square}$$

$$\frac{4}{5} + \frac{1}{7} = \frac{\square}{\square}$$

$$\frac{1}{3} + \frac{1}{2} = \frac{\square}{\square}$$

$$\frac{5}{7} + \frac{1}{4} = \frac{\square}{\square}$$

$$\frac{2}{4} + \frac{1}{6} = \frac{\square}{\square}$$

$$\frac{1}{7} + \frac{2}{4} = \frac{9}{14}$$

$$\frac{1}{3} + \frac{1}{4} = \frac{7}{12}$$

$$\frac{1}{8} + \frac{2}{6} = \frac{11}{24}$$

$$\frac{2}{7} + \frac{1}{6} = \frac{19}{42}$$

$$\frac{1}{3} + \frac{1}{4} = \frac{7}{12}$$

$$\frac{4}{7} + \frac{2}{6} = \frac{19}{21}$$

$$\frac{1}{5} + \frac{1}{3} = \frac{8}{15}$$

$$\frac{1}{2} + \frac{3}{6} = \frac{1}{1}$$

$$\frac{1}{6} + \frac{1}{3} = \frac{1}{2}$$

$$\frac{1}{2} + \frac{1}{3} = \frac{5}{6}$$

$$\frac{1}{2} + \frac{2}{5} = \frac{9}{10}$$

$$\frac{2}{8} + \frac{3}{7} = \frac{19}{28}$$

$$\frac{5}{8} + \frac{1}{4} = \frac{7}{8}$$

$$\frac{1}{3} + \frac{1}{6} = \frac{1}{2}$$

$$\frac{4}{5} + \frac{1}{7} = \frac{33}{35}$$

$$\frac{1}{3} + \frac{1}{2} = \frac{5}{6}$$

$$\frac{5}{7} + \frac{1}{4} = \frac{27}{28}$$

$$\frac{2}{4} + \frac{1}{6} = \frac{2}{3}$$
