

Adding Fractions - Unlike Denominators

Calculate the value of each addition question in lowest terms

$$\frac{1}{2} + \frac{2}{5} = \frac{\square}{\square}$$

$$\frac{2}{7} + \frac{2}{8} = \frac{\square}{\square}$$

$$\frac{2}{8} + \frac{3}{5} = \frac{\square}{\square}$$

$$\frac{1}{6} + \frac{3}{5} = \frac{\square}{\square}$$

$$\frac{4}{7} + \frac{1}{6} = \frac{\square}{\square}$$

$$\frac{1}{3} + \frac{1}{4} = \frac{\square}{\square}$$

$$\frac{3}{5} + \frac{1}{7} = \frac{\square}{\square}$$

$$\frac{2}{6} + \frac{1}{3} = \frac{\square}{\square}$$

$$\frac{1}{2} + \frac{2}{7} = \frac{\square}{\square}$$

$$\frac{1}{2} + \frac{1}{4} = \frac{\square}{\square}$$

$$\frac{1}{5} + \frac{2}{3} = \frac{\square}{\square}$$

$$\frac{2}{8} + \frac{3}{4} = \frac{\square}{\square}$$

$$\frac{1}{6} + \frac{1}{5} = \frac{\square}{\square}$$

$$\frac{2}{6} + \frac{1}{2} = \frac{\square}{\square}$$

$$\frac{2}{7} + \frac{1}{3} = \frac{\square}{\square}$$

$$\frac{2}{7} + \frac{1}{3} = \frac{\square}{\square}$$

$$\frac{1}{4} + \frac{3}{7} = \frac{\square}{\square}$$

$$\frac{1}{4} + \frac{3}{7} = \frac{\square}{\square}$$

$$\frac{1}{2} + \frac{2}{5} = \frac{9}{10}$$

$$\frac{2}{7} + \frac{2}{8} = \frac{15}{28}$$

$$\frac{2}{8} + \frac{3}{5} = \frac{17}{20}$$

$$\frac{1}{6} + \frac{3}{5} = \frac{23}{30}$$

$$\frac{4}{7} + \frac{1}{6} = \frac{31}{42}$$

$$\frac{1}{3} + \frac{1}{4} = \frac{7}{12}$$

$$\frac{3}{5} + \frac{1}{7} = \frac{26}{35}$$

$$\frac{2}{6} + \frac{1}{3} = \frac{2}{3}$$

$$\frac{1}{2} + \frac{2}{7} = \frac{11}{14}$$

$$\frac{1}{2} + \frac{1}{4} = \frac{3}{4}$$

$$\frac{1}{5} + \frac{2}{3} = \frac{13}{15}$$

$$\frac{2}{8} + \frac{3}{4} = \frac{1}{1}$$

$$\frac{1}{6} + \frac{1}{5} = \frac{11}{30}$$

$$\frac{2}{6} + \frac{1}{2} = \frac{5}{6}$$

$$\frac{2}{7} + \frac{1}{3} = \frac{13}{21}$$

$$\frac{2}{7} + \frac{1}{3} = \frac{13}{21}$$

$$\frac{1}{4} + \frac{3}{7} = \frac{19}{28}$$

$$\frac{1}{4} + \frac{3}{7} = \frac{19}{28}$$
